

# Secure your home Expect the unexpected

Protect and secure your house. After all, your house is your home.

Your safety is our number one priority. Protect your home, your property and your family against the unexpected with intrusion detection, fire detection, camera surveillance and access control.

GDW Security offers installation, maintenance and aftercare of your security system. We always offer the highest quality; accept nothing less.

# High quality is our number one priority

For a family business like GDW Security, high quality is always the main priority.

## Meet GDW Security

*January 1980.* Guy De Wilder founds GDW Security. GDW Security grows from a one-man operation into a thriving SME with more than 40 skilled employees.

*Today.* We manage security systems for over 8,500 customers in Belgium, Luxembourg and Northern France.

## GDW Security installs, repairs and maintains security systems

We have all the legal permits and hold numerous mandatory and non-mandatory quality certificates.

## Feel at home

We approach each project with a personalised, custom approach. GDW Security is not interested in being the biggest, we want to be the best. We guarantee: correct pricing for the delivered level of quality: high-quality materials, a durable system and unrivaled service.

## What do we offer?

### Camera surveillance

- Our product range does not include Wi-Fi cameras; we work with a professional range of high-resolution equipment that we can tailor to your needs.
- We also take security and integration in your network seriously.
- Our standard solutions include remote viewing and cloud storage.
- Using AI and analysis software, today's cameras can do much more than record footage. We believe in "smart" cameras. Take advantage of the possibilities to protect your home to the fullest.

## Intrusion detection

- We use wired components as much as possible. We only use wireless technology if it is aesthetically unavoidable. We also integrate intrusion detection with other techniques and technology as much as possible—from a simple lighting link with lighting and technical alarms to full integration in home automation systems.
- Design and aesthetics are also important: we offer a wide range of products to match your interior.
- We believe in a total concept with no weak points:
  1. **Preventive maintenance** and 24/7 technical assistance in accordance with legislation and INCERT regulations.  
+
  2. **Built-in SIM card** with data subscription for guaranteed communication and forwarding independent of your own network.  
+
  3. Connection to **SECURITAS control centre**, to follow up on your alarms.  
+
  4. **Smartphone app** activation to manage your system remotely.

## Fire detection

- Fire detection will be mandatory in every home as of 2020: don't be late!
- Legally, autonomous detectors with batteries are sufficient, but the following solution is better: We connect the fire detectors to a permanent power supply and the intrusion detection system battery for improved performance. Our system uses push notifications to notify you of any activity even if you are not home.
- An alternative for oversized concepts is a separate fire control unit.

## Access control

- Want to open a door, garage or storage unit with a unique code, badge or fingerprint? Now you can. You decide who has access where and when, and can monitor it.
- The access control system can be integrated into your intrusion detection system. Contact us for more information.

expect the unexpected 

## Certificates

GDW Security holds the obligatory legal permits and the most important security certifications (INCERT, BOSEC, FiSQ and ISO 9001:2008), as you would expect from a company that has been in the security industry for nearly 40 years.

## We also provide business security systems

Ask for our folder with our specific range for security in and around business and government buildings.
